I am an experienced Full-Stack Web Developer with a strong proficiency in building high-quality web applications. I specialize in front-end development with Angular, delivering clean, well-structured, and fully responsive websites with clear, properly documented code to ensure maintainability and scalability. I focus on crafting seamless user experiences with optimized, efficient solutions.

On the back-end, I am skilled in developing RESTful APIs with ASP.NET, writing well-documented and maintainable code to enhance clarity, performance, and scalability.

My strong problem-solving skills allow me to quickly and effectively debug, optimize, and implement innovative solutions.

With strong organizational skills, I am able to efficiently plan and execute projects, ensuring smooth development workflows and high-quality deliverables. I am passionate about creating robust, efficient, and scalable web applications that align with business objectives and exceed expectations.
